DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mochizuki et al (JP 08-306979).

With respect to claim 15, the reference discloses in **figs. 3 and 10** a piezoelectric actuator comprising a cylindrical, laminated piezoelectric actuator body and first **4** and second **5** common electrode disposed on the out outer wall, angularly offset.

With respect to claim 16, the reference discloses in **fig. 3** the first **4** and second **5** contact points are diametrically opposed.

With respect to claims 17, 18, and 21-23, the reference discloses a recess for both the first and second electrode layers in **fig. 10**.

With respect to claims 19 and 24-26, the reference discloses narrow strips in **fig. 3**.

With respect to claims 20, 27-31, the reference discloses connection strips in **fig. 11**.

Allowable Subject Matter

2. Claim 14 is allowed.

Response to Arguments

3. Applicant's arguments filed 5 November 2001 have been fully considered but they are not persuasive.

With respect to the Mochizuki et al (JP 08-306979) reference, the Applicants seems to be arguing limitations that are not in the in the last full paragraph on page 5. It's the Examiner's position that the recess is to avoid the second layer and the connection. In the next two paragraphs, the Applicant argues that his invention is more because Mochizuki et al (JP 08-306979) has gaps, but he admits in line 7 of page 6 that his invention has gaps. Finally the paragraph bridging pages 6 and 7, the Applicant argues "inside surface" of the cylinder which in not in the claims rejected by Mochizuki et al (JP 08-306979).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2834

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
